Mimi has done what's expected of her. She's got her university degree and she's moved out of her mum's house. There's just one more thing the 24 year-old needs to do to make her family and friends happy – get married. Mimi falls in love with Trent Thompson who is not only avoiding commitment but has more baggage than Mimi thinks she can handle. Mimi's status obsessed best friend Catia thinks she's found the one but Mimi knows Catia's lover's secret.

The only problem is that if she tells Catia the sordid truth, she implicates herself. Mimi Memoirs follows Mimi on her own journey of self-discovery and self-love. This is Ella December's third novel and contains outrageous twists and turns with a heart-warming message.
