Where is the earth? Where is the sun? Where are the stars? Me and My Place in Space takes on the simplest questions about the universe and gives answers that young children can easily understand. Using clear language, drawings, and diagrams, space unfolds before a child's eyes. With our world as the starting point, we are taken on a tour past each planet and on to the stars--all through the eyes of a young girl.

Colorful illustrations, filled with fun and detail, give children a lot to look for on every page. A glossary, included for further information, helps to provide an enjoyable, easy-to-read, and easy-to-use introduction to the universe.
