The First Stephen Hawking Comic Biography "Instead of a body that doesn't allow me to move freely, I have a mind that allows me to freely explore the universe." The doctor said he only had three years to live, and everyone said he wouldn't be able to do anything. But 30 years on Stephen Hawking has become the world's top physicist! Encounter the moving story of the life of physicist Stephen Hawking. See how his unwavering will allowed him to overcome prejudice and beat the odds against death itself, to go on to discover the secrets of the universe!
